Stadium Three Card Poker – Rules of Play

Stadium Three Card Poker is a variation of the well-known table game, using a single deck of 52 cards and can be played with an automated or live dealer (Configurable). Each player will be given the opportunity to pre-select 3 cards from a 9-card array prior to the cards being dealt.

When the betting window has exhausted, the dealer will lay out three packets of virtual or live (Configurable) cards face up on the layout, and the card locations the player has selected become his traditional Three Card Poker hand. They are then given the option to “Play” the hand for an additional wager, or “Fold” the hand and forfeit their original wager.

Rules of Play

1. The automated or live Dealer (Configurable) will begin the betting round once the timer expires on the player terminal. Players must make their desired wagers before the countdown timer expires.
2. Each player may select any 3 distinct card locations from the 9-card array on their player terminals.
3. Each player must place an Ante wager, along with the optional Pairs Plus and/or 6 Card Bonus (Configurable) bonus wagers.
 - a. Players may also blind wager Pairs Plus and/or 6 Card Bonus (Configurable) on each of the columns and rows of the 9-card array.
 - b. If making an ante wager for the dealer (Configurable - Auto RNG does not use) they must first make an Ante wager for themselves. The player can make bonus wagers regardless of whether the player has made a wager themselves.
4. When the countdown timer expires, the virtual or automated shuffler (Configurable) will present the first 3-card packet for dealing.
 - a. The Dealer will place the packet face up on the “Player Cards” section of the layout, with the bottom card of the face-up packet going in location 1 on the layout. They will then spread the packet from left to right, exposing the cards in location 2 (middle card of the face-up pack) and location 3 (top card of the face-up pack)
5. The dealer will then deal the second pack ejected by the shuffler in a similar manner, this time for locations 4-6.

6. Finally the dealer will deal the third pack ejected by the shuffler in a similar manner to the first two packs, this time for locations 7-9.
7. The players will now be given a timed opportunity to elect to “Play” or “Fold” their hands.
 - a. Players who elect to “Play” will have a wager equal to their Ante wager automatically placed in the Play betting area.
 - b. Players who elect to “Fold” will forfeit their Ante wager. Any Pairs Plus and/or 6 Card Bonus (Configurable) wagers will remain active.
 - c. Players that do not make a decision in time are defaulted to “Fold”, as electing to “Play” would take an additional wager from their credit meter.
8. When all players have made their decisions, the shuffler will then eject the final 3-card pack. The dealer will open and spread this pack in the designated “Dealer Hand” location on the layout.
9. The dealer’s hand is compared to the player’s hand and evaluated by poker rank.
 - a. If the player’s hand outranks the dealer’s hand, the Ante wager and Play wager pay 1 to 1.
 - b. If the dealer’s hand outranks the player’s hand, the Ante wager and Play wager lose.
 - c. If the player’s hand and dealer’s hand tie, the Ante wager and Play wager push.
 - d. If the dealer does not qualify by having a Queen-high hand or better, the player’s Ante wager pays 1 to 1 and the Play wager is pushed.
 - e. If the player has placed an Ante wager and a Play wager, then they are also eligible for an Ante Bonus pay if they have a qualifying hand, regardless of whether the dealer qualifies. The Ante Bonus is scaled to the amount of the Ante wager and pays according to the selected payable.
