Game Description

21+3 is a standard blackjack game with an optional 21+3 Bonus or Progressive wager. Players must make the standard blackjack wager in order to place the 21 + 3 Bonus or Progressive Jackpot wager. Players are paid against a paytable if they are able to create a qualifying hand that uses the player's first two cards combined with the dealer's face-up card. Players are limited to wagering on a maximum of four games. Card room operators are required to post on the layout or on a placard at the table that players are limited to wagering on a maximum of four games. One of the four wagers must be limited to \$5.00. Operators cannot allow wagering limits to exceed the authorized limits set out in WAC-230-15-040 and WAC 230-15-140. Side bets between players is prohibited.

All rules pertaining to the standard non-patented game of blackjack as posted on the WSGC website remain the same except as specifically noted in these game rules. The game can be played using 2-8 standard 52-card decks. The operator may choose to hand shuffle or may use an electronic automatic shuffle machine. If an electronic shuffler is to be used, it must be a WSGC approved model manufactured by a WSGC licensed manufacturer.

Rules of Play:

1. Players are required to place a standard blackjack wager to participate in the 21+3 Bonus or Progressive wager. For simplicity purpose, the word "Jackpot" will refer to either a Bonus Jackpot or Progressive Jackpot wager.
2. 21+3 is an optional Jackpot wager. The players first two cards combined with the dealer's face-up card are used to determine the pays.
3. Standard blackjack house procedures are followed by the dealer.
4. In the event a 100% award hits, the meter is reseeded. The cost of the reseed has been factored in to the casino's mathematical advantage.
5. To begin each round, players are required to place a standard blackjack wager. Optionally, players may also place a Jackpot wager. Jackpot wagers must be placed on the sensor in front of the player's wagering spot. The sensor will flash when a wager is placed.
6. Once all wagers are placed, the dealer will press the red dealer button, remove all Jackpot wagers and place the wagers into the chip tray. The sensors will remain lit, indicating a Jackpot wager was placed.
7. The dealer follows house procedures to deal the primary blackjack game.
8. The dealer then follows house procedures to reconcile primary wagers.
9. The dealer then follows house procedures to reconcile Jackpot wagers as follows:
 - a. The percentage pays are paid from the Jackpot shown on the meter.
 - b. Non-percentage pays are paid from the chip tray.
 - c. In the event of multiple Jackpot meter pays during the same round, the dealer will first pay the player farthest on his right and then move counter-clockwise to pay other players. This policy can be replaced by casino internal controls, as regulatory procedures permit.
 - d. The dealer shall immediately contact a supervisor when a Jackpot winner occurs.

- e. Upon verification of the hand, either the dealer or the supervisor (at the casino’s discretion) shall turn the jackpot event switch 45 degrees to the three o’clock position.
- f. House procedures are then followed for paying the jackpot.

This game will use the Galaxy Gaming owned Andromeda Jackpot System Series 3d or higher, containing WSGC approved components and software versions. Jackpot meter displays do not contain software. However, should displays with independent intelligence be used, they must be WSGC approved models manufactured by WSGC licensed manufacturers.

OPTIONAL BONUS WAGERS

The game includes optional bonus wagers. Players are required to place a standard blackjack wager and may optionally place any of the following offered bonus wagers:

Lucky Ladies

The player wins their Lucky Ladies wager if the player's first two cards have achieved a pre-determined triggering event according to the corresponding payable (see Appendix "A", referred to as "First 2 Cards Equal 20" on the layout bet spot). The dealer's cards are sometimes used in combination with the player's cards to determine if additional prizes are awarded. A player must make their Lucky Ladies wager before any cards are dealt.

Bust Bonus

The player wins their Bust Bonus wager if the dealer's hand results in a "bust" and the player's hand does not result in a bust with a point total of 30. This wager is placed after the initial round of cards have been dealt but prior to the dealer revealing their face-down or "hole" card. The player wins this bonus wager if the total of the dealer's hand results in a point total exceeding 21 and if the player's hand does not result in a bust with a point total of 30. Winning players are paid according to the dealer's initial face up card when matched to the corresponding payable (Appendix "B")

21+3 Classic

The player wins their 21+3 Classic wager if the player's first two cards and the dealer's face-up card have achieved a pre-determined triggering event according to the corresponding payable (see Appendix "C"). A player must make their 21+3 Classic wager before any cards are dealt.

21+3 Xtreme

The player wins their 21+3 Xtreme wager if the player's first two cards and the dealer's face-up card have achieved a pre-determined triggering event according to the corresponding payable (see Appendix "D"). A player must make their 21+3 Extreme wager before any cards are dealt.

Top 3

Top 3 is a second optional bonus wager offered with 21+3 Classic or Xtreme. A player may not make a Top 3 wager without making either a 21+3 Classic or 21+3 Xtreme wager first. A player wins if their first two cards and the dealer's face-up card have achieved a pre-determined triggering event according to the corresponding payable (see Appendix "C" and Appendix "D"). A player must make their Top 3 wager before any cards are dealt.
