Face Up Pai Gow Poker Rules of Play

1. Face Up Pai Gow Poker is a pai gow poker variant played with a 53 card deck, consisting of a standard 52 card deck and one joker. The joker may either complete a straight, flush, straight flush or act as an ace. It plays like conventional pai gow poker, except in which all the dealer cards are exposed first. If the dealer has exactly an ace- high hand "pai gow," then the hand will automatically result in a push (tie). Player's do NOT pay commission on winning hands. Face Up Pai Gow also offers the optional Fortune Bonus and (if available) the Ace-High bonus wagers.
2. To begin each round, players must make their standard Pai Gow wagers. They may also make the, Fortune Bonus, and/or (if available) Ace High bonus.
3. The Fortune Bonus bet considers the best hand possible among the player's seven cards and is reconciled against an approved posted payable. See payable for odds.
4. Players may bet any amount within table limits; however, a Fortune Bonus bet of at least \$5 qualifies them for Envy Bonus payouts. If a player wagers at least \$5 on the Fortune Bonus, the dealer must place an "Envy" lammer either on top of the Fortune Bonus wager or next to it, depending on jurisdictional rules. Players win the Envy Bonus when a player at the table receives a four of a kind or higher, excluding the dealer and his/her own hand.

5. The Ace-High bonus wager (if available) pays if the dealer's seven cards are an Ace High Pai Gow. See payable for odds.
6. Once all players have made their wagers, the dealer then follows house procedure for pai gow poker.
7. After all packets of cards are dealt, the dealer exposes their seven card and, sets it in accordance to the house way.
8. After the dealer's hand is set, and it's determined their hand doesn't contain an Ace-High pai gow, the players set their seven-card hand, and standard pai gow play continues.
9. If the dealer's hand is an ace-high "pai gow," all player main wagers are pushed.
10. While reconciling the standard Pai Gow poker wagers, the dealer also reconciles the Fortune Bonus and (if available) Ace High bonus.
 - a. If the player's hand qualifies for payouts, the dealer pays the player according to the posted payable.
 - i. Notwithstanding to the payout odds on the approved payable options and subject to gaming regulations, a casino licensee may establish a maximum aggregate amount that is payable per table limit or player limit. It remains the casino licensee's sole responsibility to post a sign at the table explaining the details and the ramifications of the aggregate win limit. The Envy Bonus payout is not an odds-based payout and therefor it is not subject to an aggregate limit.
 - ii. The dealer leaves the "Envy" lammer, if applicable, next to the player's original wager and payouts. The dealer will not pick up the envy lammer(s) until all wagers have been reconciled.
 - b. If the player's hand does not qualify for payouts, the dealer takes the players Fortune Bonus wager.
 - i. The dealer leaves the "Envy" lammer, if applicable, next to the player's original wager and payouts. The dealer will not pick up the envy lammer(s) until all wagers have been reconciled.
11. The dealer pays all Envy Bonuses at the end of the round. If at least one player has a four of a kind or higher, all players with envy lammers win—see payable**. In the event more than one player has at least four of a kind, then all players with envy lammers win multiple payouts.
 - a. A player cannot win the Envy Bonus for their own—or the dealer's—hand.

NEXUS COMAND

Face Up Pai Gow Poker Jackpot Rules of Play:

1. Face Up Pai Gow Poker offers an optional jackpot wager.
2. The bet considers the best hand possible among all the player's cards.
3. Sample paytables are listed separately.

Note: The joker is used as an Ace in the 5 Aces hand, or as any card to complete a straight flush, straight or flush.

4. The meter will be reseeded when the 100% award hits. The cost of the reseed has been factored into the casino's mathematical advantage.
5. To begin each round, players must make their regular game's wager. They may optionally place any bonus wagers and the jackpot wager. Players must place the jackpot wagers on the sensor in front of their betting position. The sensor will light up.
6. Once all players place their bets, the dealer will press "START GAME" on the keypad. The sensors will then light up, indicating a jackpot wager. The dealer will then remove all jackpot bets from the table.
7. The dealer then follows house procedures for dealing the regular game.
8. The dealer reconciles the standard wager, bonus wager, and jackpot wagers at the same time. Follow the procedure in the next section for reconciling percentage pays from the jackpot meter.
9. Jackpot winners:
 - a. The percentage pays are paid from the jackpot shown on the jackpot meter.
 - b. Other hands are paid from the tray; they do not come off the meter.
 - c. In the event more than one jackpot meter pay hits during the same round, the dealer will first pay the player farthest on the right and then move counterclockwise to pay other players. As regulatory procedures permit, this policy can be replaced by casino internal controls.
 - d. When a player has a jackpot winner, the dealer will select the player spot corresponding to the player with the winning jackpot hand. The dealer will then press the appropriate hand button on the display. (If the hand button is pressed by accident, pressing it again will turn it off.)
 - e. The dealer shall then contact a supervisor.
 - f. Once the casino verifies the jackpot win, the supervisor will press the confirm button. To complete the action, a Supervisor or Executive card (depending on jackpot level) swipe is required. This records the win on to the Game Manager computer and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize. (Reviewing the monitor connected to the Game Manager will show the prize amount to be paid, and pressing the "money bag" icon will print a win page, which can be used to help record the payout for accounting.)
 - g. Once the dealer has reconciled all action, they press "END GAME." This resets the system to begin the next hand.
 - h. Once the Supervisor or Executive card (depending on jackpot level) is swiped the prize is logged into Game Manager. If the jackpot pay needs to be backed out at this point, the award will need to be manually backed out using the Game Manager manual adjustment feature.

Face Up Pai Gow Poker Jackpot

- Face Up Pai Gow Poker Jackpot is an optional jackpot wager. All rules pertaining to standard Pai Gow Poker and approved Pai Gow Poker variation games as posted on the WSGC's website remain the same and are not altered in this game. If linked, the same payable and the same number of decks must be used between all linked Pai Gow Poker games.
- This game will use the approved Scientific Games owned jackpot system: Nexus Command Game Manager 2 v2.5.4 or higher and a jackpot display. The jackpot display can either be provided by Scientific Games or the operator.
- The jackpot display should be a table mounted monitor with no additional intelligence or functionality, including but not limited to network capability (wired or wireless). This non-intelligent monitor can either be provided by Scientific Games or the operator so long as it does not introduce any additional functionality.
- If the below game is to be hand dealt using a dealing shoe, dealers will shuffle according to house procedures. The dealer then follows the house dealing procedures. The dealer must comply with WAC 230-15-465. If any automatic shuffle machine is used in conjunction with this game, it must be a WSGC approved model, manufactured by a WSGC licensed manufacturer.

House Jackpot and Progressive Jackpots

- Operators may choose to offer up to two jackpot game options on a layout using two independent wagering sensors and displaying two independent jackpot amounts.
- Each jackpot sensor is considered a separate game.
- Progressive Jackpots cannot be linked with House Jackpots.
- All jackpots on a table must be of a single jackpot type (House Jackpot or Jackpot).
- Operators can only offer one jackpot game option per sensor.
- When operated as a house jackpot, the jackpot amount is at the discretion of the casino. Prizes are set by the casino and are required to be displayed at each gaming table. Prizes displayed are considered property of the casino until won by one or more players. The casino must post all required notices and disclosures at each table and follow all rules for house jackpots in WAC 230-15-671.
- When operated as a progressive jackpot, rules for progressive jackpot prizes are contained within WAC 230-15-680 through WAC 230-15-720.

PROGRESSIVE SYSTEMS FLEXIBILITY and RECOMMENDATIONS:

- Progressive meter contribution
 - When using a pay table in which all payouts are deducted from the meter, we recommend utilizing the system to configure meter contribution rates anywhere between 0-100%.
 - Most pay tables with this style of math are designed to grow over time when a contribution rate of 70% or more is used. If less is contributed, the risk of the meter “running dry” increases.
 - When using a pay table in which only the progressive (percentage) pays are deducted from the meter, we recommend only reducing the pre-configured meter contribution rate if any changes are made. Adjusting the contribution rate above the pre-configured value would reduce the mathematical house advantage of the wager.

- Reserve contribution
 - We recommend contributing a small portion of each progressive wager to the reserve. This amount will be added on to any configured seed amount after a 100% award is given, and will help reduce the drop in play expected after a jackpot hits.
 - We do not recommend eliminating a seed amount entirely and using the reserve as the only seed mechanism. All games present a certain likelihood of back-to-back awards, and this method runs the risk of restarting the meter at a very low amount in that case.

- Seed amount
 - We recommend using the pre-configured seed amount in the system. This amount is specific to the pay table selected for use, and is designed to offer a reasonable starting point that works with the pay table’s math.
 - If any changes are made, we recommend the seed amount to be at least as large as the largest “fixed” award on the pay table.
 - We do not recommend configuring a \$0 seed amount.
