RE: Billboard Washington v2

Dear Ms. Jones,

Thank you for requesting approval of the Billboard Washington v2. We have completed our review.

The Billboard Washington v2 is approved for use with the EyeBall, and the Billboard Washington v2 is also approved for use with the Mercury 360 Roulette Wheel in Washington State tribal casinos. This approval is contingent on the following:

- Provide information to the tribal casino to keep the rotor speed between 10-30 rpm for accurate display and recording of game outcome/ball drops.
- The keyboard and mouse must be disconnected from the Billboard controller during game play.
- All open ports on the PC box and the Break Out Box must be disabled or sealed to prevent unauthorized access to game results and event logs or unapproved network use.
- Provide information to the tribal casino about the minimum ball speed or rotations needed to provide a winning number result.
- The following items were not tested as part of this approval and cannot be used in conjunction with the equipment:
 - Cammegh Pit Boss
 - EyeCard Plus
 - Angel Eye

The electronic signatures are as follows:

BOB software version 1.24

Any modifications made to the Billboard Washington v2, EyeBall, or Mercury 360 Roulette wheel, software, or associated equipment must be submitted to us for additional testing and review. We reserve the right to investigate and reevaluate the equipment and software if we determine that such a review is required to ensure compliance.

Thank you for your cooperation during this process. We appreciate your desire to comply with our regulations. If you have any questions regarding this matter, please contact me at (360) 486-3546.

Sincerely,

Tina Griffin
